

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) ~~Card~~ A card, comprising:

a card body, comprised of ~~with~~ a ~~precut~~ microcircuit card precut in the card body, characterized in that and a token ~~is also~~ precut in the body of the card body next so as to be adjacent to the microcircuit card and extending up to a corner of the card body,

the token carrying visual information and including a hole through a thickness of the token configured to receive a key-ring such that the token may be carried by the key-ring.

2. (canceled)

3. (currently amended) ~~Card~~ The card according to claim [[2]] 1, ~~characterized in that~~ wherein the token extends to only one corner of the card body.

4. (currently amended) ~~Card~~ The card according to claim 3, ~~characterized in that~~ wherein the token extends to ~~the~~ a corner ~~at the greatest~~ having a furthest distance from the microcircuit card body.

5. (currently amended) ~~Card~~ The card according to claim 3, ~~characterized in that~~ wherein the token has sides at least approximately parallel to those of the card body.

6. (currently amended) ~~Card~~ The card according to claim 5, ~~characterized in that~~ wherein the token has sides at least approximately aligned with the sides of the microcircuit card.

7. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the card body conforms to ~~the~~ ID-1 format.

8. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the microcircuit card conforms to ~~the~~ ID-000 format.

9. (canceled)

10. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the token includes a magnetic strip ~~for~~ configured to storing store information.

11. (canceled)

12. (currently amended) ~~Card~~ The card according to claim [[11]] 1, ~~characterized in that~~ wherein the hole is in a corner of the token in ~~the~~ a vicinity of the microcircuit card.

13. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the token is connected to the remainder of the card body by mechanically weakened areas consisting of grooves.

14. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the token is ~~of the~~ a contactless type.

15. (currently amended) ~~Card~~ The card according to claim 1, ~~characterized in that~~ wherein the token is a radio-frequency identification label.

16-17. (canceled)

18. (currently amended) ~~Card~~ The card according to claim 3, ~~characterized in that~~ wherein the token includes a magnetic strip ~~for~~ configured to storing store information.

19. (canceled)

20. (currently amended) ~~Card~~ The card according to claim [[5]] 21, ~~characterized in that~~ wherein the token further includes a magnetic strip for storing information.

21. (new) A card, comprising:

a body, with a microcircuit card precut in the body, and with a token precut in the body so as to be adjacent to the microcircuit card and extending up to only a single corner of the body,

wherein the token includes a hole through a thickness of the token configured to receive a key-ring such that the token may be carried by the key-ring.

22. (new) A card, comprising:

a body, with a microcircuit card precut in the body, and with a token precut in the body so as to be adjacent to the microcircuit card and extending up to only a single corner of the body,

the token carrying at least one of visual information and a magnetic strip.

23. (new) A card, comprising:

a body, with a microcircuit card precut in the body,  
and with a token precut in the body extending up to a single  
corner of the body,

the token including a hole through a thickness of the  
token configured to receive a key-ring such that the token may be  
carried by the key-ring, and

the token carrying at least one of visual information  
and a magnetic strip.

24. (new) The card according to claim 1, wherein the  
visual information includes personalizing information.

25. (new) The card according to claim 1, wherein the  
visual information includes an address or a phone number.

26. (new) The card according to claim 1, wherein the  
visual information is provided in ink.

27. (new) The card according to claim 1, wherein the  
visual information comprises characters in relief.

28. (new) The card according to claim 1, wherein the  
card body further comprises an L-shaped residual portion  
detachably connected to the microcircuit card and to the token.
